

## **Personal Details**

Name: Rohit Kumar

Email: rohit.kumar@example.com

Phone: +91 9876543210

LinkedIn: linkedin.com/in/rohitkumar

GitHub: github.com/rohitkumar

## **Skills**

- Full Stack Development: React.js, Node.js, Express.js, MongoDB, Tailwind CSS
- AI/ML: Python, TensorFlow, PyTorch, Scikit-learn, OpenCV
- Other: Docker, Firebase, REST APIs, Git, Agile Methodologies

## **Projects**

### 1. **\*\*ProfitPulse - Investment Portal\*\***:

- Developed a platform for managing stocks, bonds, and insurance using React and Firebase.
- Implemented real-time stock updates, portfolio analysis, and AI-driven recommendations.

### 2. **\*\*AquaSol - Solar Water Purification System\*\***:

- Created a website for farmers to install solar-powered water pumps and purifiers.
- Integrated IoT for real-time data visualization.

### 3. **\*\*AI-Powered Image Classifier\*\***:

- Built a CNN model for classifying images with 95% accuracy using TensorFlow and Keras.
- Deployed the model on a Flask web app.

### 4. **\*\*Online Quiz System\*\***:

- Designed a timed quiz application with auto-scoring for sports, coding, and general knowledge.

## **Rohit Kumar - Full Stack Developer | AI/ML Enthusiast**

- Stack: Django, Bootstrap, PostgreSQL.

### 5. **\*\*PetCare - Veterinary and Pet Adoption System\*\***:

- Developed a platform for veterinary appointments and pet adoptions using Django and React.
- Integrated Firebase for user authentication and storage.

## **Education**

- Bachelor of Technology in Computer Science, ABC Engineering College, 2022 - Present
- CGPA: 9.2/10
- Higher Secondary Education, XYZ School, 2020
- Percentage: 94%

## **Certifications**

- Full Stack Development Bootcamp, Udemy
- Machine Learning Specialization, Coursera
- Python for Data Science, DataCamp
- Docker and Kubernetes, Pluralsight
